

PREFACE TO THE NINTH EDITION.

THE previous eight editions of this book, though issued at short intervals, commanded a ready sale in the Presidency and other parts of India, and the eighth edition being out of print, the present one is issued with the necessary alterations in the light of past experience.

Bombay, June 1916.

PREFACE TO THE SECOND EDITION.

THE Compilers need make no apology for the issue of the second edition within less than six months after the first. The first edition was out in October 1888, and in February 1889 several orders could not be executed, as there were no copies on hand.

In preparing this second edition, our aim has been to enlarge the practical usefulness of the book, and to render it more serviceable by selecting and inserting such words and phrases as are met with in the classical literature of the language; while, on the other hand, special attention has been paid to syntax, the most valuable and interesting portion of the language.

Moreover, we have passed beyond the mere province of Grammarians, and have inserted a variety of good many important things absolutely necessary for students, such as Arabic Plurals, Derivations, Proverbs, Idioms, Adjectives, Antonyms, Synonyms, Homonyms, Paronyms, etc. Besides a complete set of the Matriculation Examination questions with references, numerous Test Questions and Model Exercises are given at the end of every chapter, which, the Compilers venture to trust, will prove a most valuable aid to students. In many respects, therefore, a marked difference may be observed between the first and second editions of this work.

We avail ourselves of this opportunity of tendering our sincere thanks to the Principals, Head Masters, and Persian Teachers of all the High Schools in the Town and Presidency of Bombay for appreciating the worth of the book by introducing it as a textbook in their Schools.

In conclusion, our special thanks are due to Kavasji Edalji Kanga, Esq., Head Master, Moolla Feeroz Madressa, and Fellow of the Bombay University, for the prompt and valuable assistance, and the kind advice, we have received from him in the preparation of this edition.

PREFACE TO THE FIRST
EDITION.

At the present day, there exist, on this side of India, at least half a dozen books on Persian Grammar. The question, then, may naturally arise—why add one more to the number? Our answer to this question is, that students and candidates for the Matriculation Examination require a book more advanced than almost all the Manuals used in schools at present, and this desideratum we have endeavoured to supply in the following pages to the best of our ability and resources.

As we lay no claim to originality in this book, except in the general arrangement of the subject throughout, it is but fair that we should name the chief sources from which we have drawn our materials. These are—1st, a Grammar of the Persian Language, by M. Lumsden, LL.D., Professor of Arabic and Persian; and, 2nd, a Grammar of the Persian Language, by Duncan Forbes, LL.D., Professor of Oriental Languages. In compliance with the wishes of many experienced and practical Persian teachers, it has been thought absolutely necessary to break up the lists of Compounds, Prefixes, and Suffixes, and to arrange them under their respective classes.

Among the many changes introduced into this book, the most conspicuous are—that the Syntax

has been fully and systematically explained; chapters on derivations philologically treated; Proverbs, Idioms, a selection of Adjectives and Contrary Terms have been added; and numerous Model Exercises and Examination Questions have also been added.

In conclusion, we have to acknowledge our deep obligations to Kavasji Edalji Kanga, Esq., Head Master, Moolla Feeroz Madressa, and Fellow of the Bombay University. The kindness shown to us by this gentleman in carefully revising the manuscripts of this work before they passed through the press, and suggesting many useful alterations, is more than we can ever adequately repay.

Our best thanks are due to the esteemed Trustees of the Sir Jamsetjee Jejeebhoy Translation Fund for the support they have given to this work.

CHAPTER I.

Ancient Dialects of Persia.

In the early period of Persian literature, there were many provincial dialects, distinguished chiefly by the names of the provinces where they were spoken; the principal of which were زبان پهلوي زبان دري and زبان پارسي or زبان فارسي

زبان پهلوي—Pehlvi was at first spoken on the confines of ancient Persia, and afterwards, when Zend ceased to be spoken, in Persia.

زبان دري—It is a dialect made up of Pehlvi, Pâzend and Persian words, only spoken, and not written.

زبان پارسي or زبان فارسي—After Pehlvi, Persian was spoken in its original state. It was pure and simple, without any admixture of Arabic. After the conquest of the Arabs, it became greatly enriched by the introduction of Arabic words. The Persian language is melodious and elegant. A number of admirable works have been written in it by eminent persons.

Arabic Element.

In the seventh century of the Christian era, the Arabs extended their conquests and invaded Persia. In 636 A. D. they gained a decisive victory over the

Persians in the battle of Kadesia, which threw this mighty empire under the Arabian yoke. After this conquest numerous Arabic words were introduced into the Persian language.

Various Persian Handwritings.

In Persia and Arabia the art of printing is as yet very little used; hence their books are written in a variety of different hands. Of these the most common are the *Naskhi* نسخي, the *Talik* تعلیق, and the *Shikastah* شکسته.

The *Naskhi* and *Talik* are employed in Europe and India for printing Persian, Arabic, and Hindustani books. The *Naskhi* being the plainest and easiest character to read, is most frequently preferred for printing. The *Shikastah* (lit. broken-hand) is a rapid cursory hand much used in correspondence and often not very legible. It is quite irregular and unadapted for printing, but elegant in appearance when properly written.

CHAPTER II.

Orthography = اِملَا = تهجي

1. **Orthography** (*Gr. orthos*=correct; *grapho*=I write) = اِملَا (ملا = he wrote correctly) = تهجي (هجي = he spelt) explains the nature and sounds of letters, their combination into words and the correct method of spelling words.

Letters of the Alphabet.

حروفِ تهجي (or) حروفِ اِملَا

2. حروف (pl. of حرف) = **Letters** are *marks or characters* used to represent the elementary sounds of language.

3. There are thirty-two letters in the Persian Alphabet. Of these four are peculiar to the Persians, eight are peculiar to the Arabs, and twenty are common to the Persians and the Arabs.

4. The Persians write and read their letters from right to left.

THE ARABIC-PERSIAN ALPHABET.

ا	الف	<i>Alef.</i>	ث	ثي	<i>Se.</i>
ب	بي	<i>Be.</i>	ج	جيم	<i>Jeem.</i>
پ	پي	<i>Pe.</i>	چ	چي	<i>Che.</i>
ت	تي	<i>Te.</i>	ح	حي	<i>He.</i>

Letter.	Name.	Pronun- ciation.	Letter.	Name.	Pronun- ciation.
خ	خي	<i>Khe.</i>	ع	عين	<i>Ain.</i>
ه	دال	<i>Daul.</i>	غ	غين	<i>Ghain.</i>
ذ	ذال	<i>Zaul.</i>	ف	في	<i>Fe.</i>
ر	ري	<i>Re.</i>	ق	قاي	<i>Kauf.</i>

ط	طوي	<i>To,e.</i>	ه	هي	<i>He.</i>
ظ	ظوي	<i>Zo,e.</i>	ي	يي	<i>Ye.</i>

5. In the formation of a word all letters except ا—د—ذ—ر—ز—ژ— and و are joined together; thus لشکر—سلطان—وزیر—پادشاه.

6. The seven letters ا—د—ذ—ر—ز—ژ— and و are never connected with those that follow them; as, برادر = brother, داور, = God, سردار.

Note.—Letters resembling in shape or similar in form such as ب—پ—ت—ث and ج—چ—ح—خ &c., are called حروف متشابه (شبه or مثل = it resembled.)

Letters = حروف

7. حروف = Letters are divided into Consonants = حروف علت and Vowels = حروف متصحب.

8. حروف صکیم = **Consonants** (*con* = together; *sonans* = sounds) are letters which cannot be properly sounded without the help of a *vowel*.

9. The letters of the Alphabet are all consonants. The letters و—ا and ی are used as *consonants* as well as *vowels*.

10. In the beginning of a word or a syllable و—ا and ی are used as *consonants*. When they do not begin a word or a syllable they are *vowels*; as وقوف—یاد—وزیر—اسیر.

Note:—In a word when و—ا and ی are preceded by vowels they are called حروف نیم علات *Semi-vowels (half-vowels)*, as گا = a cow; بیوه = a widow; نیا = a grandfather.

11. حروف فارسی or عجمی = **Persian Letters**.

The four letters گ—ژ—چ—پ are peculiar to Persian and never occur in the Arabic language. Hence every word in which any one of the four Persian letters occurs, is considered as purely Persian; thus, پاک—چمن—ژیان—گرگ—گوش.

12. حروف عربی or تازی = **Arabic Letters**.—

The eight letters ق—ع—ظ—ط—ض—ص—ح—ث are peculiar to Arabic and are never used in the Persian language. Hence every word containing any one of the eight Arabic letters is said to be of Arabic origin; as, ضامن—صاحب—حکم—ثابت—قاصد—عشق—ظلم—طرف.

General Rule.

13. A word containing any one of the four Persian letters is considered as purely Persian; and a word in which any one of the eight Arabic letters occurs, is said to be of Arabic origin.

حُرُوفِ عَلَتْ = VOWELS.

14. حُرُوفِ عَلَتْ = Vowels are letters which make a complete sound by themselves. The vowel-letters, also called long vowels, are three, viz., و, ا, and ي.

Note :—As vowels they cannot begin a word or a syllable

15. حَرَكَاتِ ثَلَاثُ (or) اَعْرَابِ ثَلَاثُ (pl. of *حرکت* = *motion* ثَلَاثُ from ثَلْت *three*) the three short vowels or primitive vowels, are زَبَرِ = َ; زَبَرِ = ِ; and پِشِ = ُ.

(a) زَبَرِ = َ = فُتْحِ = نُصَبِ is always placed above a letter and it is sounded as short “a,” as; خَلَقَ *khalk* = a nation دَمَ *dam* = breath; مَلَكَ *malak* = an angel.

N. B.—A letter accompanied by the short vowel َ *zabar* is called مَفْتُوح or مَنْصُوب.

(b) زَبَرِ = ِ = كَسْرِهِ = جَرِ is always placed below a letter and it has the sound of a short “i,” as; گِلَ *gil* = clay; پِسرَ *pisar* = a son; مِلَکَ *milk* = property.

N. B.—A letter movable by the short vowel ـِ *zir* is called *متحرک* or *مکسر*.

(c) ـِ = *پیش* = *ضمیر* = *رفع* is always written over a letter and it is sounded as short “u,” as: *گل* *gul* = a rose; *خلق* *khulk* = nature; *دُم* *dum* = a tail; *ملک* *mulk* = a country.

N. B.—A consonant accompanied by the short vowel ـِ *pesh* is called *مرفوع* or *مضموم*.

16. *حُرُوفِ مُتَحَرِّک* = **Movable Letters** are those that are accompanied by short vowels; as, *پُر* *pur* = full; *پَر* *par* = a wing; *دِل* *dil* = heart.

17 *حُرُوفِ سَاکِن* or *مَجْزُوم* = **Quiescent Letters** are those that are not movable by primitive vowels. They are so called, because the sign *جُزْم* (or) *سُکُون* is written over them; as *دُخْتَر* = a girl; *مَرْدَم*.

N. B.—As a general rule the initial letter of every word is always movable by a short vowel and the final letter is always quiescent; as, *پَدَر*—*مَرْد* &c.

دو = **Diphthongs.**

18. *دو* = a diphthong is the union of two vowels in one compound sound; hence, diphthongs are also called *compound vowel-sounds*. There are two *diphthongs* in Persian.

I. When a consonant movable by ـ *zabar* is followed by the long vowel و , the ـ *zabar* and و unite and form a *diphthong*; viz., “au” as in the words سودا *sauda* = madness, سورت *saurat* = anger; قول *kaul* = a word, خوف *khauf* = fear.

II. When a letter accompanied by the short vowel ـ *fatah* is followed by the long vowel ی , the ـ *fatah* and ی combine and form a *diphthong*, viz., “ai” as, in the words قید *kaid* = confinement, کید *kaid* = fraud, خیر *khair* = good, سیف *saif* = a sword.

N. B.—There are eight vowel-sounds in Persian: three short vowels ـ , و , ی , three long vowels ا , او , وی and two diphthongs.

[Orthographical Signs.

علامات املای

19. There are certain marks pertaining to *orthography*, which are called *orthographical signs*. The following symbols are used in Persian:— تشدید *tashadid*; مد *madda*; تَنْوین *tanwin*; سکون (or) جزم *and* مِرزة *and* وصله *and* جزم .

I. The sign تشدید (*corroboration*), is placed over a letter when it is doubled; as, جلاد ($\text{جل} + \text{لاد}$) = an executioner; فرخ ($\text{فر} + \text{رخ}$) = happy.

Note.—The letter having a تشدید is called مَشْدَد (*strengthened*).

II. The sign مد (*extension*) is written over an *alif* at the beginning of a word to denote that

the *alif* ا is sounded long. This symbol is used to avoid the union of two *alifs* in the beginning of a word; as, افرين = آفرين = praise; آوردن = آوردن = to bring; آتش = آتش = fire.

Note.—The *alif* ا marked with this sign is called *الف ممدودة* (extended *alif*). The *alif* ا without a ممدودة is called *الف مقصورة* (abridged *alif*).

III. The sign نونين (nunation) is expressed by doubling the short vowel ا zabar and it is generally placed over the letter ا at the end of a word which assumes a *nasal* sound; as سراً sirran, secretly; صبراً sabran = patiently; خالصاً khalisan, sincerely; خصوصاً khasusan = especially; حقاً truly.

N. B.—When a word ends in ت, the letter *alif* ا is not written at the end; حقيقت hakikatan, truly; صورت suratan apparently.

Note.—The letter marked with نونين is called *منون*.

VI. The sign سکون (or) جزم (cutting or rest) is placed over a consonant when it is not accompanied by a short vowel; as, دُگان — دُخُنْ.

Note.—The letter marked with جزم is called *معزوم* (quiescent) as opposed to متحرك (movable).

V. The sign وصله (union) is placed over ا of the definite article  when it occurs between two

nouns, to denote that the last letter of the first word is united with the last letter ل of the article ال and the ا *alif* becomes entirely silent; as دار الحکومت *daru'l hukumat*=capital.

Note.—The letter ا marked with this symbol is called *موصول (united)*.

VI. The sign هـ supplies the place of ی in words that end in ه; as خواجه = a master; داد = thou hast given.

Note.—(a) When one syllable of a word ends in a vowel and the following syllable begins with a vowel, the ه *hamza* is used over it; as, فائدة = advantage; طاووس = a peacock.

(b) When two ی come together ه is placed over the first; as, آئین = custom; زائد = to bring forth.

Note.—The letter marked with هـ is called *هموز*.

The Sounds of a few Consonants and Vowels.

تَلْفِظِ حُرُوفِ صَاحِيحِ وَ حُرُوفِ عِلَّتِ
نَ نُونِ غَنَرِ = Nasal

20. In a word when the letter ن precedes ب it is sounded like م and it is called *نُونِ قَدَمَ*; as, انبار *ambār*=a heap. جنبیدن *jumbidan*=to move.

Note.—Final ن preceded by a long vowel has a soft *nasal* sound; as, چُون — چَازان — چَندین.

و = The Mute or Silent

21. In a word when the letter و is preceded by خ and followed by *alif*, it entirely loses its sound; as, خوان *khān* = a table; خواب *khāh* = sleep; خواهر *khāhir* = a sister.

22. واوِ اِشمامِ ضمّر = The letter و having a slight sound of the short vowel *ـ*. Between خ and the letters ن, ش, ر, د, ب, the sound of و is not heard and the letter خ takes a short vowel sound of *ـ* as, خوب *khūb* = good; خود *khūd* = a helmet; خون *khūn* = blood; خوش *khūsh* = pleasant.

23. واو معروف (عرف he knew, i. e., known or perceptible) when a letter movable by the short vowel *ـ* is followed by و, the *ـ* *pesh* and و unite and form a long sound; as, قوت *kūt* = food; نور *nūr* = light.

24. های ملفوظی (لفظ = he pronounced) perceptible *ـ*. Final *ـ* preceded by a long vowel *ـ* or *ـ* is fully pronounced; as, شاه *shāh* = a king; پیه *pih* = fat; گروه *guroh* = a company.

آنچه تو داری به حسن ماه ندارد. : جاه و جلال نوپاد شاه ندارد

Note.—At the end of a word when *ـ* is preceded by a consonant movable by a short vowel *ـ* *zir*, it is (ملفوظی) pronounced; as, مه *mih* = great; کم *kih* = small; سه *sih* = three.

25. **های مخفی** (خفی = *he concealed*) imperceptible ه. Final ه preceded by a letter accompanied by the short vowel — *zabar*, is not fully pronounced; as دانۀ *dāna*, a grain; خندۀ *khandā* = laughter; بندۀ *bandā* = a slave.

26. **یای معروف** (عرف = *he knew, i. e., known or perceptible* ی). When a letter movable by the short vowel — *zir* is followed by ی, the — *zir* and ی combine and produce a long sound; as, میر *mir* = a prince; سیم *sim* = silver; پیر *pīr* = an old man.

CHAPTER III.

CLASSIFICATION OF LETTERS.

تقسیم حروف

N.B.—It must be observed that the four letters peculiar to Persian, viz., پ — چ — ژ and گ are excluded from the following classifications of letters, for they are all borrowed from Arabic.

27. The twenty-eight letters of the Arabic Alphabet are divided into three classes according to their pronunciations, viz., مکتوبی-ملفوظی-مسروری.

(1) حروفِ مسروری (سر, *it was secret*) are pronounced by two letters and are 12 in number, viz., با — طا — زا — را — خا — حا — ڈا — قا — با — فا — and یا. They are so called because the last letter 'alif is not expressed in Persian.

(2) حروفِ ملفوظی (لفظ, *he pronounced*) are sounded by three letters and are 13 in number; viz., فاد — صاد — شین — سین — ذال — دال — جیم — الف — لام — and — کای — قای — غین — عین.

(3) حروفِ مکتوبی (کتب = *he wrote*) are also pronounced by three letters, but their initials and finals are the same: viz., واو and لون — میم.

28. Letters are also divided into two classes, viz., *حُرُوفٍ مَنْقُوطَةٍ* (نُقْطَةٌ or مَعْجَم = a point), dotted letters, i.e., marked with *diacritical points*; such as ن — پ — ژ &c., and *حُرُوفٍ فَايِرٍ مَنْقُوطَةٍ* or مَهْمَل or *undotted letters*, i.e., letters without *diacritical points*; such as ح — ط — د &c.

29. حُرُوفٍ مَعْجَمٍ = Dotted letters are subdivided into two classes according to the position of points.

(a) حُرُوفٍ فَوْقَانِي (فَوْق = above) letters dotted above; as, خ — غ — ق — ش — ث &c.

(b) حُرُوفٍ تَحْتَانِي (تَحْت = below) letters dotted below; as, ي — پ — چ — ج — ب &c.

30. حُرُوفٍ مَنْقُوطَةٍ = Dotted letters are also sub-divided into three classes according to the number of dots.

(a) حُرُوفٍ مَوْحِدَةٍ (وَاحِد = one) = letters with one point; as, ف — ن — خ &c.

(b) حُرُوفٍ مَثْنَاتٍ (ثَانِي = two) = letters that have two dots; as, ق — ت — ي &c.

(c) حُرُوفٌ مُثَلَّثَةٌ (ثَلَاثٌ = *three*) = letters which have three points; as, پ — ژ — چ — ث &c.

31. Letters are also known by the terms شَمْسِيّ (شَمْسٌ = *the sun*) *Solar*, and قَمَرِيّ (قَمَرٌ = *the moon*) *Lunar*.

32. حُرُوفِ شَمْسِيّ are those letters before which the letter ل of the Arabic definite article ال assumes the sound of the initial letter of the noun to which ال is prefixed. There are fourteen *shamsī* letters, viz., ش — س — ز — ر — ذ — د — ث — ت — ظ — ط — ض — ص — ن and ل; *Examples*: دَارُ الشِّفَا *dāru'sh-shifā*, a hospital; دَارُ الزَّرَبِ *dāru'z-zarab*, the mint; كَرِيمُ النَّفْسِ *karimu'n-nafs* = of a generous soul.

33. حُرُوفِ قَمَرِيّ are those letters before which the letter ل of the Arabic article ال retains its own sound. The قَمَرِيّ letters are 14 in number, viz., ك — ق — ف — غ — ع — خ — ح — ج — ب — ا — م — و — ه — ي. *Examples*: دَارُ الْمَرَضِ *dāru'l-maraz* = a hospital; دَارُ الْكُتُبِ *dāru'l-kutub*, a library.

N.B.—The student should remember that although the letter ل loses its own sound before حُرُوفِ شَمْسِيّ and takes that of the letter which follows it, it must always be written in its own form.

34. Classification of Letters according to the Organs of Speech.

حُرُوفِ شَمْسِی	حُرُوفِ قَمَرِی	
حُرُوفِ سِنْدِی = Dentals or Tooth-letters	حُرُوفِ حَلَقِی = Palatals or Palate-sounds.	حُرُوفِ اَسْلَہ = Linguals or Tongue-letters.
Teeth-sounds.	حُرُوفِ شَفْوِی = Labials or Lip-letters or Lip-sounds.	س — ز — ر ض — ص — ش
ذ — د — ث — ت ن — ل — ظ — ط	ج — ی	و — م — ف — ب
	ح — خ — ع — گ	
	ق — ک — غ	

N. B.—The letters پ — چ — ژ — گ belong to the same classes as their cognate letters (i.e., letters formed by the same organs (حُرُوفِ مُجَانِس) viz., ب — ج — ز and ک.

35. Rules for the Permutations of Letters.

فوانینِ تبدیلِ حروف

(a) Labials are interchanged with labials; as, پولاد = فولاد = steel; زبان = زفان = the tongue; نهید = نهیدو = fear; سفید = سفیدو = white.

(b) Palatals are interchanged with palatals; as, چودی = چودی = a Jew.

Note.—ج is sometimes changed into گ as لجام = لگام = a bridle; اوک = اوک = a summit.

(c) Gutturals are interchanged with gutturals; as, قوچ = قوچ = a ram; خسرو = خسرو = confessing; استاخ = استاخ = impudent; ایاق = ایاق = a cup.

(d) Linguals are interchanged with linguals; as, فرشته = فرشته = an angel; شارک = شارک = a nightingale; کشتی = کشتی = wrestling.

(e) Dentals are interchanged with dentals; as, دراج = دراج = a partridge; استاد = استاد = a master.

Note.—Sometimes the letter ا is changed into ی; as, یکدش = یکدش = union; پرمغان = پرمغان = a present.

CHAPTER IV.

Words=الفاظ

36. *Words*=الفاظ (*pl.* of لفظ) are articulate sounds, used as *signs* to convey our ideas.

All words=الفاظ=كلمات (*pl.* of كلمه) are either *primitive* = جامد or اصلى, *derivative* = مشتق, or *compound*=مركب.

1. A *primitive* or *radical* word = لفظ جامد or اصلى is not derived from another word in the language; as, كار—رحم—باغ &c.

II. A *derivative* word = كلمه مشتق is one that is formed from a *primitive*, either by prefixing or annexing a syllable; as, كاركن—بیرحم—باغبان &c.

III. A *compound* word = لفظ مرکب is formed by the union of two or more *primitive* words; as, پُشت + نا = پای + دار = بُز + دل = خار پُشت = خار &c. دارالقرار = دار + ال + قرار; ناپایدار

37. *Classifications of* كلمه according to the number of letters=حروف.

I.—ثَنائى (ثنان = two) = a *biliteral*, i. e., a word consisting of two letters; as, حق; خط; صف.

II.—ثلاثي (ثلاث = *three*) = *triliteral*, i. e., a word consisting of *three* letters; ظالم; صنم; عقل; &c.

III.—رباعي (ربع = *four*) = *quadriliteral*, i. e., a word consisting of *four* letters; ظالم; حساب; &c.

IV.—خماسي (خمس = *five*) a word of *five* letters; ظالم; حرارت; سلطان; &c.

V.—خماسي مزيد (مزيد = *increased*; فيه = *in*) a word containing more than *five* letters.

38. Contraction of Words = تخفيف کلمات

The following *contractions* of words have become current in Persian. The *contractions* are made by omitting a letter, generally a vowel and sometimes a consonant :—

اصلي Original	مُخفف Abridged Form.	معني Meaning.	اصلي Original.	مُخفف Abridged Form.	معني Meaning.
اندوه	انده	grief.	راه	ره	a road.

CHAPTER VIII.

حالت = Case.

60. **حالت** (*lit. state.*) = Case is either the *form* or *state* of a noun or pronoun, to express the *relation* which it bears to other words.

Note—All other forms of the noun except the *nominative* are called *Oblique cases*.

70. In Persian the *oblique* cases are formed by means of *prefixes* and *suffixes*.

71. The following **six** cases are used in Persian:—

- I. **حالت فاعلي** = The Nominative.
- II. **حالت مفعولي** = The Accusative.
- III. **حالت مفعولي** = The Dative.
- IV. **حالت جري** = The Objective.
- V. **حالت اضافت** = The Genitive.
- VI. **حالت ندا** = The Vocative.

72. **حالت فاعلي** = The Nominative is the case which denotes the person or thing about which we are speaking; as, **استاد رفت**; استاد از دست افتاد

73. **حالت مفعولي** = The Accusative case is generally formed by adding the termination **را**; as, **او مرا دهد**; استاد شاگرد را طلبید

RULES

74. For the Insertion of the Termination را

I. When we wish to render the object definite or particular, را is added; as,

قاضی جلّاد را طلبید; مغل طوطی را خرید

II. When the action described by the verb is such as might be performed by either the subject or the object, the termination را is added to avoid ambiguity; as, رستم سهراب را بیفکنند; شیرفیل را کشت

III. When a personal pronoun or its substitute خود is used as the object of a verb, the termination را is added; as,

نگه دار مارا ز راه خطا; مرا نمی شناسی
فلان شخص خود را پنهان کرده است

75. Rules for the Omission of را.

I. When the nature of a sentence is such as to enable the reader or hearer to comprehend the sense clearly without را, it is omitted; as,

دوستی طعام فرستاد; شخصی خطی می نوشت

II. When a conjunctive personal pronoun is used as the object of a verb, the termination را is dispensed with; as, دیروز دیدمش; پادشاه خلعتم بخشید

Position of the Termination را.

76. When the object of a verb is connected with another noun or governed by an adjective, the termination را is added to the latter noun or adjective; as, پادشاه خراسان محمود سبکتگین را
بخواب دید; این گدای شوخ چشم مبدّر را برانید

77. **حالت مفعولی** — The **Dative Case** is formed either by prefixing the particle به or by suffixing را; as, به هرمنچنین گفت نوشیروان; استاد شاگرد را انعام داد

Note—In a sentence where the Dative and the Accusative both occur together, if the Accusative be indefinite, the Dative is formed by را; as, شخصی مال خود صرافى را سپرد but if the Accusative be definite, it takes را, and then the Dative must be formed by prefixing the particle به; as,

اميرى پسر را به ادیبى داد — پادشاه آن خلعترا به وزیر داد

78. **حالت جرب** — The **Objective case** is formed by prefixing any of the prepositions از, در, با, به, and برای to the Nominative; as, از قلم, در باغ, با شمشیر

79. **حالت ندا** — The **Vocative Case**. It is formed by prefixing either ای or یا to the Nominative; as, یا خدا, یا رحیم, O Merciful God.

II. In poetry the Vocative is frequently formed by suffixing ا to the Nominative; as, کریم, O Merciful! پروردگار! O God! شهریار, خسرو! O king!

الها قادرا پروردگار — کریم بمنعم آمرزگار *

کراد دلیر شاهانوزرا — گواناچدارا مهادر اورا *

80. **حالت اضافت** — (*lit. relation*). The **Genitive** or Possessive Case is formed by prefixing the short vowel — *zir* to the noun in the Possessive Case; as, خلعت وزیر, the horse of the king; اسب پادشاه, the robe of the minister; مال سوداگر. Hence, every possessive construction must have three parts, viz., the first or governing noun is termed the **مضاف**

and the second *or* the noun governed is called *مضاف الیه* and the *vowel* زیر is called *کسرۀ اضافت*.

It undergoes changes in the following cases:—

I. If the *مضاف* ends in the long vowel *ا* or *و* the letter *ی* is used instead of زیر ;
as, پای دوست — موی سر — روی پسر
بوی گل

II. If the *مضاف* ends in the long vowel *ی* or the imperceptible *ه*, the mark *ـ* *hamza* is used; as, جامۀ برادر — خانۀ پسر

N. B.—When the *مضاف* ends in the perceptible *ه* the short *vowel* زیر *ـ* is used; as, سپاہ دشمن — راه صواب — شاه ایران

Note.—Hence there are three *علامت اضافت* (*pl. علامات*) signs of the Genitive case, viz., *ـ* *zira*; *ی* and *ـ* *hamza*.

81. When two or more nouns follow each other in the possessive case, the sign of the possessive is affixed only to the last *مضاف* as, اسب وفیل و کتیر و زیر

82. *اقسام اضافت* = Different kinds of

Izafat :—

- I. *إضافت بیانی* *or* *توضیحي*
- II. *إضافت تملیکی* *or* *تخصیصی*
- III. *إضافت توصیفی* *or* *موصوفی*
- IV. *إضافت مقلوبی* *or* *قلب اضافت*

- V. إضافَتِ ظرْفِي VI. إضافَتِ استعاره
 VII. إضافَتِ تشبیهی VIII. إضافَتِ ابْنی
 IX. نَک إضافَتِ

88. إضافَتِ بیانی or توضیحی is that kind of possessive construction in which the مضاف الیه denotes the *substance* or *material* of which the مضاف is made; as, تَختِ عاج = a throne of ivory; دیوارِ خشت = a wall of bricks; خانم طلا = a ring of gold; طوقِ سیم = a chain of silver.

48. إضافَتِ تملیکی (ملک = *property*) is that in which the مضاف الیه is the *owner* of the مضاف; as, گنجِ قارون = the treasure of Kārun; رخسِ رستم = the charger of Rustam; خانهٔ دهقان = the house of a peasant; قصرِ سلطان = the palace of the king.

Note.—Sometimes the مضاف is the owner of the مضاف الیه; as, قیصرِ یزد — سلطانِ روم — خاقانِ چین.

85. إضافَتِ توصیفی or موصوفی (*qualified*) is that which expresses the relation between the موصوفی (the noun *qualified*) and the صفت (*adjective*); as, روزِ روشن = a bright day; باغِ خرم = a delightful garden; گردِ دلیر = a brave hero; تیغِ تیز = a sharp sword; شبِ تار = a dark night.

مالِ خرم فالِ نیکو مالِ وافر حالِ خوش

اصلِ ثابتِ نسلِ باقی تَختِ عالی بختِ رام

بادِ اهرِ بود و گیتی برقرار و بردوام

Note.—When compound adjectives are used, the *إضافت* is termed *مركب* *توصيفي*; as, *اسب بادپا*, a fleet steed; *مرد سزگدا* = a merciless man, *دهر جفا پيشه* = cruel world.

86. *إضافت تشبيهی* (شبه = *it resembled*) it is a kind of *simile* (i.e., *comparison of two things*) in which the *مضاف الیه* is compared to the *مضاف*; as, *دل چون آينه* = the heart which resembles a mirror; *مرد چون شیر* = a man who resembles a lion; *رخ چون گل* = cheeks like roses; *لب چون غنچه* = lips like rosebuds.

Note.—In the example *دل*, *آينه* *دل* is the thing compared = *مُشَبَّه به* and *آينه* is the thing compared to = *مُشَبَّه*.

إضافت استعاره is that which indicates a metaphor; as, *دست عقل*, the hand of wisdom, *سر ووش*, the head of intelligence.

87. (a) *ظرفي* — *إضافت ظرفي* (*ظرف* = *a vessel*) is that kind of possessive construction in which the *مضاف الیه* is the *receptacle* of the *مضاف*; as, *آب دریا* = the water of the sea; *ریگ صحرا* — *میوه باغ*.

(b) Sometimes the *مضاف* is the *receptacle* of the *مضاف الیه*, as, *کیسه زر* = a purse of gold; *کوزه آب* = a pitcher of water; *شیشه شراب* = a bottle of wine.

Note.—In the aforesaid instances the thing contained is called **مظروف** and the vessel or the receptacle is called **ظرف**.

إضافة ابني is that in which the relation between the father and the son is expressed by the omission of the word **حجاج بن يوسف** *i. e.*, **حجاج يوسف** ; as,

88. **إضافة مقلوبی** or **قلب إضافة** (= *inverted*) is that kind of possessive construction in which the ordinary form of **إضافة** is inverted, *i. e.*, the **مضاف الیه** is preceded by **مضاف** and the **علامة إضافة** is omitted, as, **بناء عالم = عالم بناء** = the asylum of world; **سپاه سالار = سالار سپاه** = the general of an army; **آب گل = گلآب** = rose-water; **یار شهر = شهر یار** = (the friend of a city) a king.

89. **فک إضافة** — There are certain words such as **ولي** and **نايب** — **قائم** — **صاحب** — **سر** which do not admit of the **علامة إضافة**, when they are used in a possessive construction; this kind of **إضافة** is called **فک إضافة** as, **صاحب دل** = a pious man, **صاحب ہنر** = a skilful man, **سرمايه** (**سر** = source, **مايه** = wealth) capital; **قائم مقام** = a successor; **ولي نعمت** (**ولي** = a master; **نعمت** = favour) a patron.

Note.—When the words **سر** = head and **صاحب** = owner are used in a restricted sense, the **علامة إضافة** is used; as **سر دوست**, **صاحب خانہ**. ✓

Declension = تصریف

90. Persian nouns do not undergo any change in the terminations of their *oblique cases*, whether they be singular or plural, masculine or feminine.

	عدد واحد <i>Singular.</i>	عدد جمع <i>Plural.</i>
Nom. حالت فاعلی	دوست a friend	دوستان
Acc. مفعولی	دوست را a friend	دوستان را
Dat. مفعولی	به دوست or دوست را	به دوستان or دوستان را
Obj. جری	از دوست با دوست	از دوستان با دوستان
Gen. إضافت	دوست — of a friend	دوستان
Voc. ندا	ای دوست O friend!	ای دوستان

Note.—In like manner may be declined every substantive in the Persian language. The only questions are, in the first place, whether *ی* or *ه* should be used as the sign of the Genitive Case; and secondly, whether *ان* or *ها* is to be added in plural.

CHAPTER—IX.

صفت = Adjective.

91. صفت (*lit. quality*). An *Adjective* is a word used with a noun to denote some *quality* or other *attribute* belonging to the person or thing represented by the noun; as, مرد نیک = a good man; گیاه سبز = green grass; روی زیبا = a beautiful face. In these instances نیک—سبز and زیبا are adjectives, and مرد گیاه—رو are nouns qualified by these adjectives, and they are called موصوف.

92. اسم موصوف (= وصف). The noun qualified by an adjective is called اسم موصوف; as, روز روشن = a bright day; روز is موصوف and روشن is صفت; باغ خرم = a delightful garden, باغ is موصوف and خرم is صفت.

93. Position of the صفت.—In a sentence the صفت is generally placed after the موصوف and they are both connected by the short vowel *zir*, which is called کسر توصیفی; as, مرد شجاع = a brave man; شب تار = dark night; عمر عزیز = precious life.

94. It undergoes changes in the following cases:—

- (a) If the موصوف ends in long vowels *ā* or *u*, the letter *ی* is used instead of *zir*; as, گدای کور = a blind beggar; روی زیبا = a beautiful face; پای دراز = a long leg; موی سفید = white hair; هوای خوش = pleasant air.

- (b) If the موصوف ends in the imperceptible ة, the mark ـ *hamza* is placed over it; as, جامۀ سفید = a white robe; پنجه تیز = a sharp claw; چشمۀ شیرین = a sweet stream. But if the موصوف ends in the perceptible ة, the short vowel ـ *zir*, is used, as شاه عادل — کوه بلند — ماه روشن — راه راست —

Note —(a) In Poetry the adjective sometimes precedes the noun; as,

پشپوار دستور بردست شاه * اودشمن نامور رسنم است
جز از پاک ایزد نقرسم ز کسی

- (b) Some adjectives may be placed indifferently *before* or *after* the qualified nouns; as, پیران پیر — پیرزن پیر, مال بسیار — بسیار کسی, تمام روز — اعتماد تمام, نیک مرد, نوجوان, شیرین زبان, حاضر جواب.
- (c) Sometimes substantives are used as adjectives; as, مرد دزد — مرد درویش — مرد باغبان.

مراتب تفضیل = Degrees of Comparison.

95. **Comparison** is the inflection of an adjective to denote the *increase* or *decrease* of the quality implied in the adjective.

96. There are two *degrees of comparison*, viz., the *Comparative* = صفت تفضیل and the *Superlative* = صفت مبالغه.

97. **مکض** (مکض, *it was pure*). صفت مکض or اصلی. The **Positive** state or form is the simple quality itself, and is therefore *not a degree*; as, تلخ = bitter; زشت = ugly; سخت = severe.

98. **تفضیل** (فضل, *he excelled*). The **comparative** degree expresses a *greater degree* of the

quality than the positive. It is formed by adding the suffix *تر* to the *Positive*, as, شیرین تر = sweeter, بزرگتر = greater, خوبتر = better.

99. The word "*than*" after the Comparative degree is expressed by *از*; as,

شهد شیرینتر از شکر است * شیر ژیا نقر از پلنگ است

Note.—The Adjective *به* is often used in the *positive form* when denoting *comparison*, and it is generally followed by *که* or *از*; as, خاموشی به از سخن بد است

بازوی بخت به *که* بازوی زور * معزولای به *که* مشغولای
یک طلعت زیبا به از هزار خلعت دیدا * اندکی جمال به از بسیاری مال

100. *صفت مبالغه* (*it was superior*). The *Superlative* degree expresses the *highest* degree of the quality. It is formed by adding the suffix *ترین* to the *Positive*, as بزرگترین = greatest; شیرینترین = sweetest; خوبترین = best.

Note.—Sometimes the termination *ترین* is contracted into *ین*; as, بوین = بوترین = highest; بهین = بهترین = best; کھین = کھترین = smallest; مهین = مهترین = greatest. *عمیدین* ملاطین روی زمین و بهین خواتین دنیا و دین *

Note.—The *Superlative* governs the *genitive*; as, کمترین جانوران خراست * بهترین خزان جهان هنراست
کرم و سخاوت بهترین خصایل انسان است *

(b) The *Superlative* is sometimes used like a simple adjective to express *pre-eminence* in some quality, in which case the *Izafat* is not used; as,

نگویم گواهمینین گوهری — سپردم به ذامینین شوهری

"I will not say that I have given the most excellent lady to the most illustrious husband."

Arabic

Comparative and Superlative.

101. The *Comparative* and *Superlative* degrees of Arabic adjectives are formed by prefixing the letter *alif* to the triliteral root.

Note.—If we reject *servile letters* from Arabic words we get their trilateral roots. The *servile letters* are س — ت — ا — ي — و — ن — م — . It must be remembered that the *servile letters* may be used as *radical letters* of the trilateral root.

Pronouns. When they are joined to nouns, they correspond either with the *Possessive* or the *Dative Case*; as, پادشاه خاعتم بخشید, اسب من - اسبم گریخت

118. When a noun ends in ا or و the letter ی is inserted between the noun and the *pronominal suffix*; as پای من = پایم, my foot; so, پایش and پایت; گلویم, رویش and روی من = رویم, my face; so, رویت and گلویش and گلویت, my, thy and his throat.

119. When a noun ends in ے, the letter ا is inserted between the noun and the *pronominal termination*; as, خانه من = خانم, my house; in the same manner خانه اش and جامه اش and جامه ات, my, thy and his robe.

120. When these *pronominal terminations* are joined to a verb, they correspond with the Dative or Accusative Case of the personal pronouns, and are called *مفعول* مفعول ش and ت, م; as, دادم ترا = دادم ت, I gave thee; پرسیدندش = پرسیدند او را, they asked him; زرم بخشید = زرم مرا بخشید, he gave me money.

The pronoun *چه* is used only for inanimate objects, and it is always preceded by such words as *آن*, *چنان*, *چندان*, *و*.

(c) It is also used without any personal pronoun as the nominative of a verb, and the verbal suffix clearly expresses the sense; as, خود کردم, I myself did it; خود کردی. In the third person singular, **ش** is sometimes added to it for the sake of emphasis; as, خودش گفت he himself said.

Note.—Sometimes, instead of خود the words خویش and خویشمن are used; as, به چشم خویش دیدم; خویشمنرا بزرگ پنداری; پای دیوار ملک خویش بکند.

129. Different Uses of این and آن

(a) These pronouns are used both for animate and inanimate objects, and are applicable to all genders and numbers and always precede the substantive to which they refer; as این مردان this man; آن کتاب that book, آن مردان these men; آن کتابها, those books; آن زن, آن زن.

(b) When این and آن are both used together in a sentence to represent persons or things that are *near* and *distant* from the speaker, they signify "*the latter*" and "*the former*" respectively; as,

141. فعل ناقص (= نقص) — *Defective Verb.*—Verbs that have not the full complement of tenses are called defective.

N.B.—In Persian there exists a number of verbs, some of the regular forms of which (chiefly the *Imperative*, *Aorist*, and *Present*) seldom or never occur.

142 فعل بی فاعل = Impersonal Verb.—The infinitives *بایستن* and *شایستن* are called impersonal verbs, because *باید* and *شاید* are used impersonally with nouns and pronouns in the accusative case; as,

آدمیرا صبر باید * پادشاه را کرم باید
ما را خردمند بی کافی باید که تدبیر مملکت را شاید

143. فعل مشترک (= *he divided*).—**Reflexive Verbs** are those which are used transitively as well as intransitively; as,

144. فعل نفی — Negative Verb.—A verb is rendered negative by prefixing the particle نه (or ن); as, نه رسید, he did not reach; نکرده است, he has not done; نخواهد آمد, he will not come.

This ن is called نون نفی. With the imperative, م is used to express prohibition; as, ممکن don't do; مکتور, don't eat. This م is called میم نهی.

145 ن and نهی میم — Negative ن and Prohibitive م.—The distinction between the negative particles م and ن used for prohibition and negation is this, that م is used for the negative imperative only, and ن for all other tenses.

Note.—(a) When verbs beginning with الف are preceded by (ن) نون نفی, (ب) the redundant بای زاید (the negative ن) or (م) میم نهی (the prohibitive م), the ا is changed into ی; as اندیشیدن, so, مینداز—نیداخت—بیداخت—انداخت—بیدیش—میدیش.

(b) When the same particles (ن and م) are prefixed to the verbs beginning with الف ممدود, the first ا is changed into ی and the second ا is retained; as, آموخت—میاموز—نیاموخت—بیاموخت &c.

145. a. افعال مسمی = Denominative Verbs are those that are formed from nouns by adding یدن; as, جنگ + یدن = جنگیدن = to fight; خواب + یدن = خوابیدن = to sleep; ستیز + یدن = ستیزیدن = to quarrel; فهم + یدن = فهمیدن = to understand; طلب + یدن = طلبیدن = to call; پسند + یدن = پسندیدن = to approve.

146. افعال فیاسی — Weak or Regular Verbs, *i. e.*, those whose imperatives are formed according to the established rules ; as, **انقادن** ; **آموختن**.

147. افعال سماعی — Strong or Irregular Verbs, *i. e.*, those whose imperatives are not formed according to the rules ; as, **دادن** ; **کردن**

III. By prefixing a preposition to an infinitive ; as, **در آمدن** = to enter ; **درخواستن** = to propose ; **دور یافتن** = to think ; **برگشتن** = to return ; **بر آوردن** = to produce.

IV. By prefixing an adverb to an infinitive ; as, **بالا رفتن** = to ascend ; **فرو خوردن** = to swallow ; **فرود آمدن** = to descend ; **باز گشتن** = to return ; **باز کردن** = to open.

Inflection of Verbs.—Verbs are inflected for voice, mood, tense, number and person.

Number and Person.

149. Verbs have number and person. To denote the number and person of a verb, the following suffixes are used:—

Verbal Suffixes or Personal Terminations.

Person.	Singular.	Plural.
مُتَكَلِّم 1st person.	م	یم
مُخَاطَب 2nd person.	ی	ید
غَايِب 3rd person.	د or ت	ند

Note.—In the past and the past imperfect tenses ت or د is used for the third person singular, because the infinitive always ends in دَن or تَن; ا , کرد , می کرد , آموخت , می آموخت . In the aorist and the present د is always used for the third person singular; as, می کند , آموزد , کند .

N.B.—In all tenses, formed by the help of the auxiliary verbs, the verbal suffixes are added to the auxiliary and not to the principal verb; as, رسیده باشند , خواهیم رفت , خواهی آمد , میتوانیم ساخت , آورده بودند .

Sometimes the verbal suffixes م and ی are added to nouns, pronouns and adjectives to represent the full forms ماری تو که هرکرا بینی بُزنی , respectively; as, هستی and هستم .

منم سلطان این ملک ; تو حکیم کاملی

The Three Tenses = اَزمَنهٔ ثلاثه

150. As time is divisible into Past, Present and Future, we have three primary tenses in Persian, which are called اَزمَنهٔ ثلاثه (pl. of زمان , time, tense and ثلث three); these are:—

- I. زمان ماضي Past Tense, which shows an action already done; as, رفت = he went.
- II. زمان حال Present Tense, which shows an action as being done; as, ميرود = he is going.
- III. زمان مستقبل Future Tense, which shows an action to be done; as, خواهد رفت = he will go.

151. زمان ماضي The Past Tense, (3rd pers. sing.) is formed by the omission of the final letter ن from the infinitive; as, پرسیدن P.T. پرسید.

Singular = واحد

1st pers. پرسیدم I asked.

2nd pers. پرسیدی thou askedst.

3rd pers. پرسید he asked.

Plural = جمع

پرسیدیم we asked.

پرسیدید you asked.

پرسیدند they asked.

152. زمان حال — The Present Indefinite or the Present Imperfect Tense is formed by prefixing the particle می (sometimes همی), and adding the verbal suffixes to the imperative; as, پرسیدن imperative پرس.

Singular = واحد

1st pers. می پرسم I ask or I am asking.

2nd pers. می پرسی thou askest or thou art asking.

3rd pers. می پرسد he asks or he is asking.

Plural = جمع

می پرسیم, we ask or we are asking.

می پرسید, you ask or you are asking.

می پرسند, they ask or they are asking.

153. زمان مستقبل (قبل, *before*). — The Future Tense is formed by prefixing خواه (*the imperative of خواستن*), with personal terminations to the past tense of the principal verb.

Singular = واحد	Plural = جمع
1st pers. خواهیم پرسید, I will ask.	خواهیم پرسید, we will ask.
2nd pers. خواهی پرسید, thou wilt ask.	خواهید پرسید, you will ask.
3rd pers. خواهد پرسید, he will ask.	خواهند پرسید, they will ask.

Note.—In poetry the infinitive is sometimes used instead of the past tense; as, که خواهی شدن ناگهان پایمال — که خواهیم شدن صوبی ایوان زمین
که خواهد کردنت روزی فراموش; مرا کسی نخواهد خریدن به هیچ

154. مضارع. — The Aorist (which expresses *indefinite time*) is formed by adding the personal terminations to the imperative of a verb; as, پرسیدن imperative پرس.

Singular = واحد	Plural = جمع
1st pers. پرسم, I may ask.	پرسیم, we may ask.
2nd pers. پرسی, thou mayst ask.	پرسید, you may ask.
3rd pers. پرسد, he may ask.	پرسند, they may ask.

N. B.—The principal use of this tense is to express an infinitive clause; as, *نمیخواهم که روی او ببینم* = "I do not wish to see his face." *آستاد خواست که چوبی بردارد* و *کودکانرا بزند* * آن *پسر خواست که گلهای بچیند و به خانۀ خود برد* * من *میتوانم که به خانۀ روم و طعام بشورم*

Note.—It has sometimes the force of the future tense; as, *دلاگر کدی راستی اختیار* — *شود خلق دنیا ترا دوستدار* *گریک مستن قبول کدی هرچم بشوایی ترا بدهم*

155. PRESENT TENSES = از منۀ حال

The Present Indefinite }
The Present Imperfect } = حال زمان

The Present Perfect = ماضی قریب

The Past Indefinite = ماضی مطلق

The Future Perfect }

158. ماضی مطلق = The Past Indefinite is already explained (*vide* Article 151).

159. ماضی استمراری (مر = *continued*).— The Past Imperfect is formed by prefixing the particle می (*sometimes* می) to the Past Tense; as,

Singular = واحد

Plural = جمع

1st pers. می پرسیدم = I was asking.

می پرسیدیم = we were asking.

2nd pers. می پرسیدی = thou wast asking.

می پرسیدید = you were asking.

3rd pers. می پرسید = he was asking.

می پرسیدند = they were asking.

160. ماضی مستعمل (عمل *he practised*).—The **Habitual Past** is formed by suffixing *ی* to all the persons of the Past Tense except the 2nd pers.; as,

Singular=واحد	Plural=جمع
1st pers. پرسیدمی = I used to ask.	پرسیدیمی = we used to ask.
2nd pers. Not used.	Not used.
3rd pers. پرسیدى = he used to ask.	پرسیدندى = they used to ask.

N.B.—The four following tenses are compounded of the Past Participle and Auxiliaries. This Participle (اسم مفعول) is formed by adding *ه* to the Past Tense, as, پرسید, past participle پرسیده, asked or having asked.

161. ماضی قریب (قرب *it approached*).—The **Perfect Tense** represents an action or event that has only *just now* been completed. It is formed by adding the terminations است — ای — ام (*for the singular*) and اند — اید — ایم (*for the plural*) to the past participle of the principal verb; as,

Singular=واحد	Plural=جمع
1st pers. پرسیده ام = I have asked.	پرسیده ایم = we have asked.
2nd pers. پرسیده اید = or پرسیده ای = thou hast asked.	پرسیده اند = you have asked.
3rd pers. پرسیده است = he has asked.	پرسیده اند = they have asked.

Note.—When است and ام are combined with the words *چه* or *نه*, the *ه* is often rejected, and the *alif* is changed into *ی*; as, کیست = *چه است*, who is he? *چه است*

181. Infinitives in **دن** are preceded by **و، ر، ا**, and **ی**. (These letters may be grouped into the word روانی = a course.)

Note.—There are three other letters, viz., **ز، ت، م** which also precede **دن**, but as there is only one infinitive of each kind, they are excluded from the general rule; as, ستدن to take (Imp. ستان); زدن, to strike (Imp. زن); آمدن to come. (Imp. آی).

حروف جر = Prepositions.

A Preposition is a word placed before a noun or pronoun to show the relation between it and some other word in the sentence.

198. Simple Prepositions are از (*in poetry frequently contracted into ز*) = from = by; با = with; بر = on = upon; در = in = into; بی = without; تا = till = until.

These prepositions are termed *حروف معنوی* (*real particles*).

199. Position of Prepositions.—Prepositions are placed before the simple nominative forms of *Nouns* and *Pronouns*; as, در خانه = in the house; بر درخت = on a tree; با من = with me.

ای مهر تو در دلبها — وی مهر تو بر لبها *

وی شور تو در سرها — وی سر تو در جانها *

Note.—Certain prepositions, such as بالا = above, پیش = before, نزد = near, زیر = beneath, require the *izafat*, or the sign of the genitive case, between them and the noun which they govern; as, •

بالای سر — زیر درخت — پیش پادشاه — نزد طبیب

200. حروف استثنا = Prepositions of Exception, *i.e.*, prepositions meaning *except*; as, جز = سوای = *except*; از = *except*. غیر is followed by *as*, نداریم غیر از تو فریادرس

Note.—A person or thing that is excepted is called *مستثنی*
 I. and that from which *مستثنی* is excepted is called
 تمام رعیت پیش پادشاه رفتند مگر سهراب II. ; *as*,
 I II

201. Redundant Particles = حروف زاید :
 Some particles, such as, مر, فراز, فرا, &c., are used

redundantly in a sentence without affecting the sense and they are called حروف زاید.

حرف التثکیر = Indefinite Article.

202. An Indefinite Article is expressed by adding تَنکیر یای to a noun; as, = شخصی a man; درختی = a tree; پادشاهی = a king.

حرف التعریف = Definite Article.

203. The Definite Article is expressed by تَنکیر یای followed by the relative که; as,

درختی که اکنون گرفتست پای
پادشاهی که طرح ظلم فکند

درختی که = the tree; پادشاهی که = the king.

CHAPTER XIV.

Syntax = نكرو

204. نكرو = Syntax treats of the correct method of arranging words into sentences.

Words are related to each other, by way of Concord = موافقت

205. موافقت = Concord is the agreement of one word with another in gender, number, person, or case.

206. جملہ = A Sentence is a collection of words so arranged as to express one complete thought.

Every sentence consists of two parts; the *subject* and the *predicate*.

207. مسند الیہ or موضوع or مبتدا = the *subject*, i. e., the person or thing about which something is said; it is also termed فاعل (lit. "the doer of an action") the Nominative.

208. مسند بر or ماکمول or خبر = the *predicate* is that which we say or affirm respecting the subject, and is expressed by the verb; as,

آن پسر مسست است and آن پسر میخورد

209. رابط (= ربط = he joined) the *Copula* i. e., the word which unites the *subject* and the *predicate*. The words است and بود are used as رابط; as, نوشیروان معلم بود; سہراب وکیل است

210. *رابط نفی and رابط اثبات = Affirmative Copula and Negative Copula.* What is said about the subject is sometimes *affirmed* or *denied*; hence the copula may be either *affirmative* or *negative*; as,

نوشیروان معلوم است; مهرا ب طیب نیست

RULES FOR

211. The arrangement of words in a sentence.

Rule I. In a simple sentence the subject is placed first, then the object, and lastly, the predicate; as,

وزیر اسیرا خرید; پادشاه وزیر را طلبید

N. B.—(a) In poetry the subject is sometimes placed last; as, راست نخواهد شد این پشت کوز; سود ندارد هم اسباب راست

(b) Sometimes the object stands emphatically first; as اورا تو به ده درم خریدی; نوا من خود مند پنداشتم

(c) In poetry the verb is sometimes placed first for the sake of emphasis, thus شد غلامی که آب جو آرد

نیاموزد بهایم از بو گفتار, بدوزد شره دیده هوشمند
زند جامه ناپاک گازران بوسنگ; نخورد شهرنیم خورده سگ

Rule II. Words and phrases denoting time place, manner and cause are generally placed before the subject; thus, روزی در شهری درویشی بردگان بقالی رفت
در موسم تابستان روزی شامگاه گرویی مردمان در باغ
رفتند; در آن زمان بسبب عنفوان جوانی پادشاه در سیر
وشکار مشغول می شد; در شهری انبار پنبه بدزدی رفت

Rule III. When a personal pronoun is the subject of a verb, it is expressed in the verbal suffix, hence the subject is usually omitted.

اگر با او مذاقشه خواهی کرد سزا خواهی یافت
فردا از آن طوفی خواهم رفت و تو را سلام خواهم کرد

Rule IV. When a clause stands as the object of a verb, it is placed last; thus, آن مرد گفت سزا
احمق میپنداری * پادشاهی در خواب دید که تمام دلدانهای
او افتاده بود ; شنیدم که ملکرا دشمنی معب روی نمود ; آن
شخص نوشت که مردکی در خط من نظر میکند *

Rule V. When the object of a verb is qualified by a relative clause, the object is placed before the verb, and the qualifying phrase after it; thus,
طوطی را دیدم که بر سر درختی نشسته بود *

سرهنگزاده را دیدم که عقل و خود داشت ; پادشاهی را
شنیدم که بگفتن اسیری اشارت کرد ; پارسای را دیدم که
زخم پلنگ داشت ; دلقانی را دیدند که تخم میکاشت

Rule VI. In Persian the indirect form of construction is dispensed with. The exact words of the speaker are reproduced, and they are introduced by the word که ; thus, او سزا گفت که منم سلطان این ملک ;
دو برادر مال خود پیرزنی را سپردند و گفتند که حالا
بسفر میرویم هرگاه ما بر دو خواهم آمد مال خواهیم گرفت ;
لقمان گفت که هر چه نه دانم بپرسیدن آن ننگ ندارم

N.B.—When a Person has occasion to relate what he has heard from another, the usage of the Persian language requires that it should be done in the direct construction.

212. In Persian the subject of a proposition may be either a *noun*, a *pronoun*, an *infinitive*, or a *clause*.

- (a) **Noun.** لشکر شکست یافت ; پادشاه بر تخت نشست
 (b) **Pronoun.** او مرا دید ; من تو را میشناسم
 (c) **Infinitive** { خوردنش تذرستی آردبار
 توسیدنم پای رفتن بپست
 (d) **Clause.** { هرچه رود بر سرم رواست
 هرچه زود بر آید دیر نپاید

213. In Persian the Object or Complement of a transitive verb may be either a *noun*, a *pronoun*, an *infinitive*, or a *clause*.

- (a) **Noun.** شیر فیل را کشت ; شخصی خطی می نوشت
 (b) **Pronoun.** نگه دار مار از راه خطا ; مرا میشناسی
 (c) **Infinitive.** خروشیدن توکان شدید
 امیری گفتن آغاز کرد ; بادی مخالف وزیدن گرفت
 (d) **Clause.** هرچه در میان آید بخورد ; هرچه در دل آید بگوید
 هرچه از دوزان بهمت خواستی در تن افزودی و از جان کاستی

214. Rules for the Concord or Agreement of a Verb with its Subject.

Rule I. When the subject denotes a rational object, the verb agrees with it in number and person; as, غلامی از نود صاحب خود گریخت ; من او را خاموش گردانم ; عاصیان از گدازه توبه کنند ; چگونه دل داری که میگری

Rule II. Two or more nouns in the singular denoting animate objects require the verb to be put

روباة و شیر و مرد نزد قفس، thus, رسیدند * شیری و مردی در یک خانه تصویر خود دیدند *

Rule III. When the subject denotes an inanimate object, the verb generally remains singular whether the subject be singular or plural; thus, چشمانش در چشم خانه همی گردید * درختان شگفت و گلهاى چمن بباد رفت ; دانهها خشک شد , واقعا در پیش است

Rule IV. Two or more nouns in the singular denoting inanimate objects require the verb to be put in the singular; thus, خرابي و بدنامي آید ز جور, علم و مستحاطات بهترین خصایل انسان است * درشتي و نرمي بهم به است * زر و سیم از سنگ همی آید *

Rule V. When the subject of a verb denoting an animate object is preceded by a numeral adjective, it always remains singular in form, but takes a plural verb; but if it denotes an inanimate object, the verb is put in the singular; thus, ده درویش در گلیمي بخشپند * چهار کس بطریق تفرج در باغ رفتند * چهل سال عمر عزیزت گذشت * صد من روغن کفایت کند *

Rule VI. Nouns of multitude, denoting animate objects, sometimes take the verb in the singular and sometimes in the plural, according to the unity or plurality of the idea conceived in the mind of the speaker; thus, شهنشاه عادلرا رعیت لشکر است خاقي براو گرد آمدند و تقویت کردند * رعیت چو بیم اند و سلطان درخت * طایفه دزدان بر سر کوهي نشستہ بودند * جماعتی آهنگ گریز کردند *

N.B.—When a *collective noun* conveys *unity of idea*, the verb should be *singular*; as, رعیت چون لشکر است but when it conveys *plurality of idea*, the verb must be *plural*; as,

رعیت چو بیخ اند و سلطان درخت

Rule VII. Arabic plurals, denoting rational beings, take the verb in the plural; but if they denote inanimate objects, the verb is put in the singular: as, حکما از قایل آن فرو ماندند; بدریا در مضاف، بدیشمار است * ارکان دولت وصیت ملک بخت آوردند * اکابر میگویند که فواید سفر بسیار است ارکان دولت بپسندیدند *

Rule VIII. When nominatives of different persons are joined by و, the verb is plural and agrees with the first rather than with the second and with the second rather than with the third; as, من و تو هر دو خواجه تاشانیم—بندگ بارگاه سلطانیم من و از چون دو مغز بادام صحبت داشتیم * من و رفیقای سالها سفر کرده بودیم * من و تو مثل شیر و شکر هستیم *

Rule IX. When inferiors speak to or of their superiors, the verb is generally employed in the third person plural. Thus, a servant, in speaking of his master, would say, اگر جناب عالی قبول فرمایند صاحب خانه بیرون رفته اند * جهان پناه بسیار خوار هستند * اگر امیر قدم رنجه نمایند *

215. مَحذُوف = The Omission of a Verb.

When two or more sentences having the same predicate are connected by the conjunction و, the verb is not repeated in the next sentence; this

omission of the verb is called محذوف (omitted)
= ELLIPSIS.

نه روز آرام دارم و نه شب خواب
عابد طعام لذیذ خوردن گرفت و کسوت لطیف پوشیدن
و فواکه شیرین چشیدن * بخت بلندت یاری کرد و اقبال
رهبری * خدا خالق زمین و آسمان است و رازق شاه و گدا *
همه کسرا عقل خود به کمال نماید و روی خود به جمال *

Note.—Sometimes the subject, and sometimes the subject together with its verb, is omitted from a sentence without affecting the sense; this omission is known by the term مقدر
= ELLIPSIS, as, بنام جهاندار و جان آفرین
is omitted from the beginning of this sentence.

چنان پهن خوان کرم گفتند—که سیمرغ در قاف قسمت خورد
In this sentence “پروندگان” is مقدر = ELLIPSIS.

216. Different kinds of مفعول

I. مفعول فیه = The accusative of “time”; as
آن شخص سه روز بر دکان بقال نشست *
اگر صد سال گذر آتش فروزد. امروز بکش چو میتوان کشت
دو بامداد گر آید کسی بخدمت شاه; تمام شب زیار مید

II. مفعول مطلق = The cognate accusative.

Some verbs take a noun of *kindred* meaning for their object, and it is called the *cognate object*; as,

بکوشید کوشیدن مودوار * همه گفتند با بد و باز گفت
مضطربان سرود می سرازند * ابر باران می بارد
بچشیدم چشیدن می * او خواست که دمی در دم *

III. مفعول به = The object of a transitive verb;
as, باغبان خر را زد

CHAPTER XVI.

The Numerical Order of the Alphabet.

حساب جمل

230. The twenty-eight letters of the Arabic alphabet have each a numeric value, as shown in the following table:—

<i>kaliman.</i>	<i>hatti.</i>	<i>harwaz.</i>	<i>abjad.</i>
ك ل م ن	ح ط ي	ه و ز	ا ب ج د
50, 40, 30, 20	10, 9, 8	7, 6, 5	4, 3, 2, 1
<i>zazagh.</i>	<i>sakhar.</i>	<i>kurshat.</i>	<i>sa'afas.</i>

س ع ف ص ف ر ش ت ث ذ خ ذ غ ظ غ
1000, 900, 800, 700, 600, 500, 400, 300, 200, 100, 90, 80, 70, 60

The numerical values are counted from *one* to *ten*, then from *ten* to *hundred* by tens, and from *hundred* to *thousand* by hundreds.

N.B.—This arrangement is also called the *Abjad* system from the first word of the numerical order.

Note.—The letter ح is called حاي حطي and the letter ه is called هاي روز, because they begin the words حطي and روز in the *Abjad* system.

Note.—Numbers are also formed by letters according to this method; for example—

16 = يو = 15 = يه = 14 = يد = 13 = يچ = 12 = يب = 11 = يا;
22 = كب = 21 = كا = 20 = ك = 19 = كط = 18 = كچ = 17 = كز;
28 = كح = 27 = كز = 26 = كو = 25 = كه = 24 = كه = 23 = كه;
29 = كط = 30 = ل, etc.

231. This numeric system is used in forming chronograms (*inscriptions in which certain dates are expressed by numerical letters*) denoting dates of historical events. These are expressed by a short sentence, such that the numerical values of all the letters, when added together, amount to the year (of the Hijra) in which the event took place. Thus, Sultan Babar was born on the *sixth* of the *Muharram* month. It is strange that the numerical value of شش مُهرَم gives the year in which this prince was born: 888 A. H.

Note—هجرة = flight or departure, i. e., the day on which Muhammad departed from Mecca to Medina. It was on Friday the 15th of July, 622 A. D.

N.B.—The four Persian letters, viz., گ—ز—ج—پ have the same value as their cognate letters, ک—ز—ج—ب.

Note.—In order to find the *Christian* date corresponding to any *Hijri* year, apply the following rule:—

Rule 1.—From the given number of *Mussalman* years deduct three per cent., and to the remainder add the number 621 54; the sum is the period of the *Christian* era. For example, Sultan Baber died in 937 A. H. From this number deduct three per cent., i. e., 28, and the remainder is 909. To this number add 621, and the sum is 1530 A. D.

Note.—In order to find the *Mahomedan* year corresponding to any *Christian* date, apply the following rule:—

Rule 11.—From the given number of *Christian* years, deduct the number 621 54, and to the remainder add three per cent. of the same; as, for instance, Baber died in 1530 A. D. From this number deduct 621, and the remainder is 909. To this last number add three per cent. of the same i. e., 28, and the sum is 937 A. H.

CHAPTER XVII.

Arabic Forms and Measures.

232. In modern Persian more than half the substantives and adjectives in use are pure Arabic. In almost every page of even the most popular Persian books, such as the *Gulistan* and the *Bustan* of Sa'adi, the *Akhlak-i-Muhsini* and the *Anwar-i-Suhili* of Kashifi, whole phrases and sentences from the Arabic are introduced. It is, therefore, absolutely necessary to point out and explain the more prominent peculiarities of such Arabic words as are of frequent occurrence in the Persian language.

N.B.—Sir Charles Wilkins says, “ Arabic words introduced into the Persian language, might be counted by thousands. The two languages, Persian and Arabic, are so copious and are so extensively cultivated that the best Persian writers may and do employ Arabic words at their own discretion without limit or reserve.”

233. The radical words of the Arabic language generally consist of three letters, and the Arabian grammarians consider the third person singular of the past tense of every verb as the Root or Basis of such verb; as, **كتب**, he wrote; **نظر**, he looked.

These roots are expanded by means of certain letters, either prefixed or inserted somewhere between the beginning and the end, so as to produce certain forms, bearing a relation to the original root; as, **كاتب** (نظر root). **انظار**—**منظور**—**انظار**—**ناظر**, as, **كتب** (root). **كفاب**—**مكتوب**—**مكتب**.

234. The letters employed for the development and expansion of the trilateral roots of the Arabic language are called Servile Letters (حروف زاید) and they are seven in number, viz., ت, م, س, ن, و, د, and ي.

The radical letters (حروف اصلي) are twenty-one in number, and they are so called because they are always found in the roots or primitive forms of Arabic words.

Rules for the Insertion of Servile Letters.

235. **Rule I.** The serviles ا and ت may occur either at the beginning, or in the middle, or at the end of a word; as, اقبال, fortune; اكرام, respect; مرحبا, welcome; تعليم, instruction; استفسار, inquiry; حقيقت = truth.

Rule II. The servile س is always used as the second letter of a word, and it is preceded either by ا or م, and followed by ت; as, استقبال, reception; استبصار, foresight; مستفيد, a gainer; مستوجب, worthy.

Rule III. The servile م is always used at the beginning; as, مفتاح a key; مدرسة, a college; مهذب.

Rule IV. The serviles ن and ي are employed either in the interior, or at the end; as, انفعال, shame; عصيان, sin; شريف, noble; حاجي, a pilgrim.

Rule V. The و is employed in the middle of a word; as, مظلوم, oppressed; معلوم, known; معكروم.

Rule for finding the Root.

236. If we strip every Arabic word of its servile letters, we at once come to the Root. Thus, in the

words انفعال = shame, استغفار = forgiveness, and معرفت = knowledge, we at once see that the *roots* are غفر, عرف and غفر, respectively.

Note.—In finding roots of Arabic words with a ت, one ت should be considered as servile, and the other ت, should be changed into radical و; as, اتفاق = accident (root وفق it happened); اتكال = confidence (وكل = he entrusted); اتصال = union (وصل = he united).

The servile ت which comes after ز and ض is changed into د and ط respectively; as, ازدحام (rt. زوج) ازدواج (rt. زحم) اضطراب (rt. ضرب) اضطوار (rt. ضرر).

N.B.—It must be observed, however, that the seven serviles may be employed as radical letters (حروف اصلي) of the trilateral root; as, تعليم (علم he taught) instruction; نظر (منظر he looked) scene; مكتب (كتب he wrote) a school; نطق (نطق he spoke) oration.

Note.—A little practice, however, will enable the student to get over difficulties of this sort.

The term *Form* is adopted to denote the more outward appearance of the primary root. The various modifications or changes which a form may undergo by the application of the short vowels, are called *Measures* of such form.

The Arabs have adopted the trilateral root فعل, with a view to exemplify the various forms and measures of their words.

237. The following forms and measures, all springing from the trilateral root, comprehend such only as will be found most useful to Persian students.

First Form. فاعل—This form has two measures, viz. 1st فاعِل, which is the Noun of Agency in Arabic, and may be either used as a substantive or an adjective in Persian; thus حاکِم = a governor; غالب = a conqueror; شاعر = a poet; قادر = powerful; حادِق = skilful. 2nd, فاعِل; thus خاتم = a ring; قالب = a mould.

Second Form. مفعول—This form has only one measure, viz., مفعُول. It is the passive participle in Arabic and it may be used as a substantive in Persian, thus مکتوب (written) a letter or a book; مخلوق (created) a creature; معلوم (known) science; معشوق (loved) a mistress.

OPINIONS.

“ ‘Hints on the Study of Persian’ is a very good Grammar, and a very useful and comprehensive work for the study of Persian. Though the book at first sight appears small, yet a judicious perusal of it will show, in a striking manner, that much thought, judgment, and labour have been bestowed on it, and that the Authors are deserving both public praise and patronage ”

(Sd.) HAIRAT,

Professor of Persian,

BOMBAY, 10th May 1892

“ ‘Hints on the Study of Persian’ is an excellent manual of Persian Grammar. Many innovations have been introduced, and explanations of Arabic terms and expression also have been given. It ought to prove of great use to students taking up Persian as their Second Language in University Examinations. The framework of the book, the arrangement and the method of treatment are all excellent. It only needs a little more encouragement ”

“ The compilers of ‘Hints on the Study of Persian’ have clearly reconciled theory with practice, without which no living language will be learnt promptly and thoroughly. The principles adopted by the compilers in the arrangement and the classification of grammatical materials are such as will enable students to acquire a practical knowledge of the Persian language in the shortest time possible. With respect to the grammatical rules, the compilers have kept in view the main object of communicating facts in the

simplest and the most popular way possible. It is a peculiar advantage of this book that sufficient attention is paid to the treatment of Arabic words, Syntax, Idioms, Proverbs, Synonyms, Homonyms, etc. The compilers have the merit of giving a very intelligible arrangement of grammatical materials to students who want to acquire a thorough knowledge of the Persian language, and wish to speak and write it with fluency and facility. It must be observed that the book is excellently printed—a circumstance which will not fail to increase the popularity of this excellent manual. The best proof of its usefulness is the issue of the fourth edition in four years."

"I have no doubt 'Hints on the Study of Persian' will prove very useful to the students of the Persian language. I was particularly much pleased with the lists of Idioms, Proverbs, Synonyms, Homonyms, etc. It was a good idea to give a short account of the Arabic Grammar to enable the student to distinguish the two elements in modern Persian. The Authors have collected an amount of practical information quite necessary for the perfect knowledge of the language, and yet hardly to be found in our Grammars, at least those in use in Europe. As it is, this book is a very remarkable performance which will be as creditable to the Authors as useful to the readers."

"'Hints on the Study of Persian' is, indeed, a very useful and comprehensive Persian Grammar. It will be a very good *code mecum* of the students wishing to have a clear idea of all the grammatical principles of the Persian Language.

This book is specially valuable for full and correct explanations of all technical terms, useful examples, and very good model exercises. Messrs. Kangas' discussion of Syntax and Verbs with their conjugations is more complete and accurate than that of all other manuals of Persian Grammar. Moreover, the value of this excellent book is much enhanced by different Chapters on Proverbs, Idioms, and by model exercises, and the large number of important questions with references with which all chapters conclude. In short, I am so much satisfied with the utility of this valuable work that I have great pleasure in strongly recommending it to the students of the Persian Language of Central India and Upper India."

"Hints on the Study of Persian' is the most useful and comprehensive manual of Persian Grammar. It is a complete Grammar of the Persian Language for High Schools. It is at the same time brief, accurate and intelligible, and thus saves much time and hard labour. It is a desirable novelty, and it will be of great value to the students of the subject, who ought to be grateful to the Authors for their learned assistance. I shall recommend it confidently to all those who stand in need of a good Persian Grammar."

"The Authors of 'Hints on the Study of Persian' have struck a new line for themselves and produced a book of considerable merit. A careful examination of the entire work satisfies me that great care and much labour have been devoted to its production. Regarded both from the teachers' and from the students' point of view, the book must be pronounced excellent. It is clear in statement and accurate in

the rules laid down. The book has already made its way and will be found indispensable by the students of the Persian Language."

"‘Hints on the Study of Persian’ is a very useful and interesting production. The Authors seem to have bestowed much care and attention in the compilation of this Manual. The advantages of the systematic arrangement of its various parts are obvious. Its contents are judiciously selected. The book will certainly be a great help to the students of the Persian language, and the Authors deserve credit for thus trying to facilitate their work."

"This book at once bears testimony to the great labour the Authors must have undergone in order to make the book so very useful. Besides good and comprehensive grammatical rules, it contains many useful Proverbs, Idioms, and many other valuable things of which no trace is to be found in other Persian Grammars. It may with great advantage be introduced into High Schools."

Hints on the Study of Persian' is, in fact, a complete Grammar 'Multum in Parvo.' The arrangement and get-up of the book are admirable. Each chapter is replete with useful information, and the subject handled is dealt with exhaustively and with precision. Questions on each chapter, as well as Matriculation Examination Questions with reference numbers to rules for solution, will be a great blessing to the students of the Persian language going up for the University Examination."

REVIEWS.

The Bombay Educational Record.—"Messrs. Pestonjee & Co., and Jamsetjee B. Kanga the Persian Tutors

have jointly published a text-book in Persian for the use of Standards VI and VII. in High Schools, which appears to be a distinct advance on Manuals of this kind. It is entitled 'Hints on the Study of Persian,' is admirably printed, and is full of practical, valuable suggestions, and the best methods of teaching this popular language."—*December, 1888.*

The Times of India.—"We have much pleasure in strongly recommending this excellent 'Hints on the Study of Persian' to the students preparing for the Matriculation Examination. It is a nicely got-up book, showing great toil and care, and is exactly suited to the wants and comprehension of students. The definitions and illustrations have been judiciously selected, and the notes are admirable. The fact that it has been employed as a text-book in almost all the High Schools is a sufficient proof of the value of the work. In many previous manuals of Persian Grammar written for the use of schools, too little attention has been paid to Syntax, Derivations and Idioms, and a most valuable aid to the study of the Persian language has thus been comparatively neglected, but the Authors of this book have supplied this deficiency by introducing separate chapters on these subjects, and the students who wish to learn a simple easy style of writing Persian will find great help in this book. The Grammar is altogether a most useful one, and will be found a very suitable text-book for High Schools."—*December 1st, 1888 and May 18th, 1889.*

The Bombay Gazette.—"The Authors of this book are the Senior Persian Tutors of the two leading High Schools, and they have had therefore ample opportunities of thoroughly ascertaining the wants of Students. They have rendered excellent service to our High Schools by supplying the long-felt want of a suitable Persian Text-book. Every subject under treatment is systematically arranged, and at the same time expressed in a simple easy style. The book may be recommended to the students preparing for the Matriculation Examination as the best Persian Grammar."—*December 5th, 1888.*

The Deccan Herald.—" 'Hints on the Study of Persian' is edited by Messrs. Kangas, the able and experienced Persian

tutors, and this in itself is a guarantee of the accuracy and usefulness of the book. The general get-up and arrangement of the book are equal to those of any English work, while the matter contained in it is so varied and comprehensive and so skilfully and conveniently condensed in every chapter, that the work stands alone of its kind among all similar books. Not the least important feature of the book is the series of questions with references at the end of every chapter, which will, no doubt, prove a very valuable help to students. Its merits are so widely known and appreciated, and its importance and usefulness are so justly recognised that it has been regarded as an indispensable companion of the students of the Persian language. We really know of no other manual of Persian Grammar at once so good, so accurate, so handy and so inexpensive. We cordially wish the Authors the success they deserve."—POONA, 29th August 1890.

The Indian Spectator —The compilers of the 'Hints on the Study of Persian,' both experienced Persian teachers, have jointly tried their best to give a complete course of the Grammar of the language in a condensed form. From the mode of treatment, the work appears to be based upon the model of a standard English Grammar. Again, it seems that the compilers have missed not a single authority to refer to, in order to make their publication as useful and instructive as could be made. The system of classification and arrangement is English, and therefore affords greater facilities to students to learn Persian Grammar in a regular course. The compilers have used their best knowledge and experience in collecting and explaining a large number of Idioms of the Persian tongue. They have done all they could to supply the desideratum of a Persian Grammar, and placed within the reach of students a cheap and easy manual of the kind. It is a very useful compendium for students of Persian."—June 16th, 1889.
